## MANTRAS TO ACHIEVE SUCCESS

**S**uccess is not at all easy to achieve. Success in layman's language means to attain the desired goal. To achieve any goal it is important to focus on that objective. You must have heard people say "Every journey begins with a single step", similarly one must take the first step towards success. On the path to reaching one's goal an individual might encounter hurdles. Hurdles will always be there, it's just that one should know how to deal with them.

So, for becoming successful in life

here are some general success mantras that one can follow in life and taste success in return. These are:

- **Set proper schedule:** Proper scheduling is needed to know what all is to be done for achieving the goal.
- **Make small targets:** At first, make small goals and then move on to bigger targets.
- **Read motivational books, quotes:** This is a must to get motivated and inspired when you are feeling low or lost.
- **Work at own pace:** Completion of

work is important, not the pace. Take your time to do what you want to do, however you want to do it.

- **Self- belief is very important:** Keep telling yourself every step of the way "Yes I can and I will do it". This is important to stay motivated.

I hope that these mantras can help in bringing success in your lives.
