

Shivalik Public School, Mohali

The students enthusiastically participated in various activities held to commemorate the benevolent Mother Earth. The creative activities were organised with a view to sensitise the children about the conservation of natural resources and to motivate them to do their bit towards making their planet beautiful. The day commenced with a PPT on the importance of Earth Day and the students took a pledge to preserve and conserve their self-sustaining planet. Other activities like poster making, poem recitations and planting saplings gave the students an opportunity to care for their Mother Earth.
