

Single Use Plastic—From Bane to Ban

'Do your little bit of good where you are; it's those little bits of good put together that overwhelm the world.'

The use of plastic is very harmful to the environment and human life and single use plastic plays a major role in spreading pollution. These single use plastics are also the cause of the sewerage blockage problems. Therefore, a small initiative was taken up by the Eco Club members of Shivalik Public School Mohali, Phase 6 to create awareness regarding the ban of single use plastic items through PowerPoint presentation. The presentation was shown in respective classes by eco club members to educate students about single use plastic, their adverse effects and recent government policy to ban various items under SUP's and if not followed, strict actions would be taken up. So it is high time to stop using plastic items for making mother earth green and clean for living.

"Be the change you wish to see in the world. "
