

Eco Club Members Visited Resource Management Centre for Awareness on Waste Segregation and Waste Management

Eco club members of Shivalik Public School, Phase 6, Mohali, embarked on a visit to the Resource Management Centre (RMC), SAS Nagar, Mohali, a facility dedicated to efficiently managing various types of waste. Located within the jurisdiction of the Municipal Corporation Mohali, the RMC serves as a key initiative for sustainable waste disposal and resource utilization. The Resource Management Centre signifies a proactive approach towards creating a cleaner and more sustainable environment for the residents of Mohali. The visit aimed to promote environmental awareness and sustainable waste disposal methods among the youth. The Eco Club members, accompanied by Ms. Mehak (Eco Club Incharge), had an insightful tour of the RMC facility to witness first-hand waste management processes in place. Interactive sessions were conducted by District Coordinator of Swachh Bharat Mission (Ms. Vandana), educating the students on the importance of waste segregation at the source and the impact it has on environmental conservation. Demonstrations showcased modern waste disposal technologies and the recycling processes and practices like baling plastic waste for fuel, coconut waste management for products like diya and pots, and addressing legacy waste challenges. Students actively participated in discussions, asking questions, and sharing their perspectives on how to implement similar practices in their school and community. The Eco Club members are now inspired to initiate waste segregation programs within their school and community.
